They will be expected to crPage 10Use this double puzzle for quickly reviewing or assessing your students' understanding of ecological organization. More engaging than a traditional worksheet. It will work well as an in-class or homework assignment. You can even use it as a quiz. Simply print and go! Keywords: science, biology, life science, environmental science, species, organism, population, community, ecosystem, biome, biosphere, rainforest, terrestrial, abiotic, printable, worksheet, interactive, puzzle, funPage 11The Serengeti is a vast ecosystem in east-central Africa. It covers 12,000 square miles, giving rise to its name, which is derived from the Maasai language and means "endless plains." This region of Africa is located in north Tanzania and extends to southwestern Kenya. The Serengeti is best known for its huge herds of plains animals, especially wildebeests, gazelles, and zebras, and it is the only place in Africa where vast land-animal migrations still take place. The Maasai people of the SerengPage 12Ecological Succession Comic Stripby Drawing activity! Step-by-step guide for students to create a comic strip illustrating both primary and secondary succession. TERMSCopyrightImportant Ecological Roles Reading Passage can be used for close reading, one-on-one intervention, homework or sub work.• The reading passages to learn more about my reading passages to for face to face or a virtual/remote environment. The lesson guides students through primary and secondary succession of a pond ecosystem. It includes a reading section on indicator species as well. Each section has models and diagrams to analyze with critical thinking questions to guide the students. This is appropriate for an AP, honors, or on-level environmental or biology course. This worksheet contains basic conceptual questions about the Biosphere, Levels of Ecological Organization. You can access the answer key, also a word and PDF document of this content from the following resource: Biosphere, Levels of Ecological Organization - WorksheetIn this worksheet, students will answer questions about the following terms:- Biosphere- Biome- Ecosystem- Community- Population- Organization found in found in a graphic organization organization organization found in the state of Holt's Environmental Science Chapter 4 textbook. Students wrote the levels in the pyramid, and then chose an individual to follow up the levels. They included a small definition too for each term. This is a WONDERFUL and fun resource for students to learn this concept. Page 19This Fluency Builder includes the following vocabulary terms: Species, Population, Community, Commensalism, Mutualism, Predator-Prey Relationship, Symbiotic Often used for math, I utilize Fluency Builders to develop fluency in the academic language of science as a quick starter or closer in class. In this fast paced review activity, students are given a 5x5 grid of definitions, pictures, formulas, or diagrams. The associated vocabulary terms are in a complementary 5x5 grid on thePage 20This PowerPoint presentation helps students understanding. Assessment questions are embedded throughout the presentation. Key terms discussed: organism, species, population, ecological niche, community, habitat, ecosystem, abiotic, biotic, biotic Ecological Theory and Literary Criticism. Students will explore the interconnections between nature and culture. Aside from the numerous terms and media pieces, such as The Lorax, Steinbeck's East of Eden, "Misty Mountain Hop" by Led Zepplin,

and Mad Max: Fury Road.Page 22This is a curriculum guide for Ecological Systems. This aligns with Biology TEKS B.12A, B.12B, B.12C, B.12D. This is a great document for PLC planning, and yearly planning. Choice board, and post assessment will be available for bundling. There's a lot more than the preview picture provides!!! Ecosystems change over time in predictable ways, following a pattern of succession that produces changes in the diversity of spePage 23This bundle helps create a start to finish unit for Ecological Systems. This is the perfect document to get your Professional Learning Community working together. Here's what is in the bundle:1. Curriculum Guide- Vocabulary, Big Ideas, Essential Questions (Learning Objectives), Learning Standards, Understandings, and Performance Tasks. 2. Choice Board- There are choices for performance tasks for each standard, students will watch videos, read bPage 24This FlipChart presentation explores levels of ecological organization! More specifically, the following concepts are discussed: organizations. There are a total of 143 slides. Some of the slides contain information/notes, images, videos, interactives, as well as review questions or turn-and-talk slides with images to check for understanding. Please note: This was designed for 7th grade, but I think itPage 25A one page graphic organizer that can be printed out at 80% to fit in INB or as a whole page. Use this with your own powerpoint, notes, textbook, etc. to organize your student's notes on succession. Includes primary, secondary, and aquatic along with a place for vocabulary definitions (Pioneer Species, Climax Community, Eutrophication, Equilibrium). I made this nearpod to walk them through it: feel free to make a copy for yourself and change it as you wouldPage 26 Ecological Succession- Gardenby I got this great idea from Region 13 (Shawna). I created picture cards which show each stage of succession in a garden as well as some limiting factors that might cause a change in the succession order (such as adding bee's to your garden). Challenges students to predict possible outcomes. Students create a story to go along with the pictures. Great ELL and SIOP activity. Ecological Relationships Practiceby This worksheet will help students in the process of answering the guestion. Types: This no prep Earth Day Bundle will teach students about their own ecological footprint, introduce them to vocabulary associated with Earth Day and our environment, and they will learn what these words actually mean! This bundle gives you a 20% discount if you were to purchase each resource separately. Earth Day Challenge This fun, educational challenge teaches students to reflect on their ecological footprint. There are 20 acts of environmental services for them to try and accomplish on Earth Day. Disruptions to Ecological Systems Anchor Chartby Provide your students high quality visuals with these anchor charts! This is just one of the 16 anchor chart set. These focus specifically on the disruptions to an ecological system. On each poster you will find:~Title and Essential Questions~At least 3-4 tested vocabulary words~Engaging visualsThe anchor chart is intended for you toPrint as a poster and decorate your bulletin boardUse in science stationsInsert in student notebooks as a great review sheetInsert into your PowerPoint/Google SlideTypes:Draw it Out! Ecological successionby This is a quick, simple, and easy activity to have a visual representation of the differences and similarities between primary and secondary succession. It will allow students to have a visual representation of the differences and similarities between primary and secondary succession. It will allow students to have a visual representation of the differences and similarities between primary and secondary succession. It will allow students to have a visual representation of the differences and similarities between primary and secondary succession. It will allow students to have a visual representation of the differences and similarities between primary and secondary succession. It will allow students to have a visual representation of the differences and similarities between primary and secondary succession. It will allow students to have a visual representation of the differences and similarities between primary and secondary succession. It will allow students to have a visual representation of the differences and similarities between primary and secondary succession. It will allow students to have a visual representation of the differences and similarities between primary and secondary succession. It will allow students to have a visual representation of the differences and similarities between primary and secondary succession. It will allow students to have a visual representation of the differences and similarities between primary and secondary succession. It will allow students to have a visual representation of the differences and similarities between primary and secondary succession. It will allow students to have a visual representation of the differences and secondary succession. It will allow students to have a visual representation of the differences and secondary succession. It will allow students to have a visual representation of the differences and secondary succession. It will allow students to have a visual representation paper!Students will draw the different stages of succession and briefly describe what is happening in each stage. Student exemplars coming soon!Ecological succession. You can use these flashcards for review practice games, in-class practice, or homework assignments. While it is important to teach our middle school students how to make flashcards, making flashcards for an entire science unit can be overwhelming and time-consuming for students. By providing students will pre-made flashcards, you are letting them spend their time working withSubjects:Types:Ecological Organization Digital Pyramid Projectby In this activity, students will identify the terms relating to ecological organization. Finally, students will create a digital version of an ecological organization pyramid. An example is provided within the doc.SC 7.EC.5A.1 Develop and use models to describe the characteristics of the levels of organization within ecosystems, and biomes). Ecological Succession Guided Cornell Notes by Guided cornell notes provide students with a structured format for taking notes. Students will write down the main points of the presentation by answering the questions provided on the cornell notes handout. They will also summarize the notes by answering an "essential question". Great study tool and way to teach students effective note taking skills. Also great for a flipped classroom model, students can easily complete on their own and classroom time can be used for implementing what was taughEcological Relationship Vocabulary Pictures / Word Wallby This activity will allow your students to explore/discuss on their own the meaning of the terms associated with Ecological Relationship using the provided vocabulary pictures. teacher- centered discussion type. The last portion of each page where the students are ask to create their own vocabulary pictures could serve as a project. You can also copy, print, and paste the vocabulary pictures on separate sheets of paper
